COPENHAGEN

Our values

Danish identity

Founded in 1994 by Danish entrepreneur Michael Waltersdorff at just 18 years old, Halo Design embodies the essence of Danish craftsmanship and innovation. We take pride in our heritage, which is reflected in the quality of our lamps.

Functionality

We design our lighting solutions with everyday life in mind, integrating practical features that make them not only beautiful but also useful. Our goal is to create lighting that adds value by improving how people interact with their spaces.

Nordic design

Rooted in Nordic traditions, our design philosophy blends classic elements with a modern touch. This approach ensures that our lighting solutions are timeless yet fresh, making them stand out in a global market.

Value for money

We believe that great design should be accessible. By balancing aesthetics with practicality, we deliver high-quality lighting at a price that offers true value. Our commitment is to make well-designed products available to a wide audience.

Lighting shapes how we perceive our surroundings and significantly impacts our mood. We believe that creating a positive and cozy atmosphere requires the right lighting to help people feel at ease.

Modern technology allows us to deliver customizable, energy-efficient lighting that can enhance emotional well-being. For this reason, our lamps are designed to be both functional and technically advanced, seamlessly integrating into any space to create a true sense of home.

DC

A new take on a modern classic. The DC portable table lamp evolves from the original DC series, combining its iconic character with cordless flexibility. The head moves freely thanks to the elegant wooden arc, allowing intuitive light direction. Crafted in metal, wood, and brass details, the lamp balances form and function — ideal for indoor moments or outdoor evenings.

On The Move

This portable lamp combines modernity and a classic design with walnut veneer and brass details. Thanks to a magnetic connection and its spherical shape, it allows the luminaire to rotate at will to optimise the direction of the light.
